# 5. AUTOMOTIVE ELECTRONICS CENTRE OF EXCELLENCE

Head of the department : **Dr. N. Gangatharan**

Faculty in charge [ECE] : **Mr. S. Jai Ganesh**

## **ABOUT CENTRE OF EXCELLENCE:**

RMKCET has a dedicated center for excellence in Automotive Electronics to mold the students in the automotive electronics domain. We have strong relationship with the industries in framing the syllabus and drafting the training content so as to make the students of RMKCET industry ready soon after they graduate. As on date the center of excellence is associated with the industry leaders such as KPIT and BOSCH. In association with such industry leaders the students will soil their hands in the field of automotive electronics with industry specified syllabus. Students will be trained on different verticals.

KPIT offers the flagship training **PROGRAM FOR ACADEMIC COLLOBORATION AND ENGAGEMENT (PACE)** for the students of RMKCET recruited during their pre final year itself. This training is one of its kind offered by KPIT to engage the young and vibrant engineers pan India. This training will enable the students to get trained on several aspects such as C and Embedded Systems, C++ and OOPS, MATLAB Simulink and Model Based Design. Students undergoing this training will be taught all the relevant concepts and they will be evaluated on par with industry standards.

RMKCET also shares the dedicated Joint Certification Centre Infrastructure established in association with BOSCH at RMK Engineering College premises. Through this facility students stands a change to engage themselves in industry-oriented training programs offered by BOSCH. This state-of-the-art training infrastructure worth approximately Rupees twenty-five lakhs is wide spread across 1500 Square feet with ample amount of space allocated for workshop. Students literally operate the same equipment's as similar to the ones present in the current automotive industries. Students will be trained on 3 modules such as **Automotive Electrical Systems in Starter and Alternator-** (AETB 03) which will help the students to understand the working of auto electrical systems in vehicles and deals with the working principle of starter motor and alternator, testing of starter and alternator on test bench and Alternator & Starter Motor - construction, working principle, charging & testing using AETB. Second, **Vehicle Diagnostics** (KTS 5xx) is to understand the automotive vehicle diagnosis using KTS 5xx and deals with Diesel and gasoline engine diagnosis on vehicles using KTS 5xx and the practical operations in vehicle. Finally, **Measurement and Testing of Sensors and Actuators** module is to understand how to test and measure the sensors and actuators in vehicles and deals with the usage of multi-channel oscilloscope for synchronized signals functions testing and working principles of each sensor, actuators in an engine. All these three modules are 90% hands-on oriented training and on successful completion students would gain a certificate from RMK as well as BOSCH.
